Die Medicon Schädelklemmen wurden entsprechend den speziellen Anforderungen im OP entwickelt. In Verbindung mit der Grundeinheit bietet das innovative Kopfhalterungssystem ein Maximum an Sicherheit und Stabilität.

The Medicon head rests were developed to meet the special demands in the operating theatre. In combination with the basic unit this innovative head rest system offers a maximum of safety and stability.

Los fijadores craneal fueron concebidos de Medicon para responder a las exigencias especiales en los quirófanos. En combinación con la unidad básica el sistema innovador de fijación craneal presenta un máximo de seguridad y estabilidad.

Le système de maintien crânien de Medicon a été développé conformément aux demandes des chirurgiens. Notre système novateur de maintien crânien en combinaison avec l'unité de base offre le maximum de stabilité et de sécurité.

Il sistema di fissazione cranica è stato sviluppato in base alle esigenze specifiche della sala operatoria. Grazie all'unità di base, l'innovativo sistema di fissazione cranica offre maggior sicurezza e stabilità.

Trepanationen können bereits um 10.000 v. Chr. nachgewiesen werden. In Südamerika wurden mehrere Gräber (etwa 2000 Jahre alt) mit trepanierten Schädeln und chirurgischen Werkzeugen gefunden.

There is evidence of trepanations as early as 10,000 BC. Several graves (around 2000 years old) with trepanned skulls and surgical instruments were found in South America.

Existen pruebas de que ya se realizaban trepanaciones por el año 10.000 a. de C. En Sudamérica se han encontrado varias tumbas (de alrededor de 2000 años de antigüedad) con cráneos trepanados y herramientas quirúrgicas.

On retrouve des traces de trépanation dès 10 000 av.J.C. environ. Plusieurs tombes (vieilles d'environ 2 000 ans) contenant des crânes trépanés et des instruments chirurgicaux ont été retrouvées en Amérique du Sud.

Già dal 10.000 a.C. si hanno dimostrazioni di trapanazioni. In Sudamerica sono state ritrovate tombe (di circa 2000 anni fa) con crani trapanati e strumenti chirurgici.

Bei harter Kortikalis oder Fixation kleiner Knochenfragmente wird ein Vorbohren empfohlen.
 In case of hard cortical bone substance or fixation of small bone fragments we recommend pre-drilling.
 En caso de una cortical muy dura o de la fijación de fragmentos pequeños recomendamos la perforación previa.
 Pour le cas où la corticale serait trop dure ou pour la fixation de petits fragments osseux, nous recommandons un préforage.
 In presenza di una corticale molto dura oppure per la fissazione di piccoli frammenti consigliamo di perforare prima dell'inserimento della vite.

LOW PROFILE
1.5 mm

Die 0,4 mm "Low Profile"-Platten ermöglichen eine der Knochenkontur angepaßte Fixierung in kranialen Regionen mit geringer Weichteildecke.

The 0.4 mm "Low Profile" plates allow fixation matched to the bone contour in cranial regions with low soft tissue coverage.

Las placas "Low Profile" de 0,4 mm permiten la fijación adaptada al contorno óseo en las regiones craneales con una capa delgada de partes blandas.

Les plaques "Low Profile" de 0,4 mm permettent une fixation adaptée aux contours osseux dans la zone crânienne, avec une couverture minimale des tissus mous.

Le placche "Low Profile" da 0,4 mm consentono un fissaggio che si adatta al profilo dell'osso delle regioni craniche con ridotta copertura del tessuto molle.

Die vergrößerte Senkbohrung lässt den Schraubenkopf tiefer in die Platte einsinken.
The enlarged lowered borehole permits a deeper sinking of the screwhead into the plate.
El hundimiento mayor permite que el tornillo profundiza en la placa.
Le plus gros forage permet à la tête de vis d'être plus profondément insérée dans la plaque.
L'incavo ingrandito permette alla testa della vite di infossarsi più profondamente.

Bei harter Kortikalis oder Fixation kleiner Knochenfragmente wird ein Vorbohren empfohlen.
In case of hard cortical bone substance or fixation of small bone fragments we recommend pre-drilling.
En caso de una cortical muy dura o de la fijación de fragmentos pequeños recomendamos la perforación previa.
Pour le cas où la corticale serait trop dure ou pour la fixation de petits fragments osseux, nous recommandons un préforage.
In presenza di una corticale molto dura oppure per la fissazione di piccoli frammenti consigliamo di perforare prima dell'inserimento della vite.

Alle Werkzeuge besitzen eine Markierung zur schnellen und sicheren Positionierung des Werkzeuges im Arbeitsaufsatz und eine Längenangabe (S, M, L, XL, XXL) zur besseren Unterscheidung.

All tools have a marking for a quick and secure positioning of the tool into the hand piece as well as an indication of length (S, M, L, XL, XXL) for a better distinction.

Los terminales disponen de una marca para el posiconamiento rápido y seguro en el cabezal. Esta marca sirve tambien como indicación de longitud (S, M, L, XL, XXL).

Tous les outils ont un marquage permettant une positionnement sûre et rapide dans les inserts, et un marquage de taille (S, M, L, XL, XXL) pour un meilleur choix.

Tutte le punte presentano una marcatura per posizionarle velocemente ed in modo sicuro negli inserti. La stessa marcatura serve anche a distinguere meglio la lunghezza (S, M, L, XL, XXL).
