

Magnetic Surgical

Optimize the safety and efficiency of your surgical procedures.

In the operating room, keeping instruments within immediate reach while preventing them from slipping or falling provides a significant advantage in terms of both efficiency and safety for the entire surgical team.

This magnetic surgical mat is specifically designed to meet this need. Its medical-grade silicone surface incorporates powerful magnets that securely hold forceps, scissors and other metallic instruments in place, even on inclined or contoured surfaces.

Key Benefits:

- **Powerful magnetic retention** : stable retention of metallic instruments on inclined or constrained surfaces.
- **Ergonomics & safety** : immediate access to instruments and a significant reduction in the risk of accidental drops.
- **Seamless integration** : reusable and autoclavable, it integrates directly into standard operating room sterilization protocols.

Technical Specifications

- **Reference** : 9006-0101
- **Dimensions** : 380 x 300 mm
- **Type** : Non-sterile, reusable, autoclavable
- **MRI Compatibility** : MR Unsafe (Incompatible environnement IRM)

Features & Use

- **High-strength medical-grade silicone** : flexible and durable material designed to withstand the demands of intensive operating room use.
- **Easy cleaning and sterilization** : supplied non-sterile. Easy to clean, roll up and autoclave (cleaning, sterilization and drying are required before each use).
- **Durable design** : designed to withstand numerous cycles of use over time.
- **Class I medical device** in accordance with Regulation (EU) 2017/745 (MDR), manufactured by an ISO 13485-certified manufacturer.
